Overview & Achievements

Worked in various fields, which gives me extensive knowledge of IT projects.

- as a PM / BA for a year
- as a JS developer for more than 5 years
- as a QA engineer for almost 2 years

Worked in multi-functional, multicultural, remote teams, teams with big time-zone differences;

Worked in areas: data management, e-commerce, finance, tourism;

Improved team productivity by ~30% through proper use of agile artifacts

Improved builds stability and delivery speed through proper environments usage and setting up QA team processes
